- Node.js
- MongoDB
- Next.js

WORK EXPERIENCE

Senior Frontend Engineer

BillingPlatform

📅 Jun 2022 - current

- Enhanced the application widget compilation service, resulting in improved response time to breakdowns from several hours to 5 seconds
- Implemented an online code editor with a live preview feature, enabling real-time editing of micro-frontend code
- Developed front-end architecture documentation to facilitate the onboarding of new developers and enable colleagues to grasp the application's operational principles

Senior Frontend Engineer

WavesDucks

📅 Jan 2022 - Oct 2022

- Launched AR-game Duck Hunt on NFT NYC event, the largest and most prestigious NFT conference in the world
- Optimized SVG animation resulting in a 2x improvement in page loading speed

Senior Frontend Engineer

Yandex

📅 March 2021 - May 2022

- Led the front-end development and design of an HR startup project, enabling the management of over 5,000 employees across 20 company warehouses
- Developed a design system for a startup focused on warehouse and commodity logistics

Frontend Engineer

Dom.rf

📅 Jun 2020 - Feb 2021

- Integrated TypeScript into a mortgage application processing service in 2 weeks

Web Developer

Galeco

📅 Sep 2017 - Dec 2020

- Created an interactive service for calculating drainage systems using building geometry, resulting in a reduction of order processing time from 2-3 hours to 5-10 minutes
